

C-D SERIES

DELIVERING RUGGED PERFORMANCE AND SOLID SUPPORT

Crown's C-D Series 13,000 to 20,000 pound diesel pneumatic forklifts combine industrial features, operator-centric design and Crown's extensive network of support to deliver a better experience for the operator and performance that exceeds throughput expectations year after year.

Discover the features of the powerful CD60-90 models:

Industrial Diesel Engine

A 3.4 L Doosan diesel engine with gear-driven valve train produces 108 HP providing increased reliability and low maintenance. Compliant with Tier 4 Final exhaust emissions without the use of a Diesel Particulate Filter. Offers three performance modes: STD, ECO and Drive.

Attachments and Accessories

A variety of attachment options including sidershifters, integral fork positioners and weight scales are available. For enhanced load protection, hydraulic accumulators reduce carriage bounce while anti-racking valves absorb unintended impacts.

Oil-Cooled Disc Brakes

Dual braking assemblies are fully enclosed to prevent outside contamination and include a 5-year, 10,000-hour warranty, providing exceptional stopping power and long life.

Operator Comfort

A suspension seat, tilt steering and thoughtful control placement reduce fatigue. Optional cabins with power tilting facilitate ease of service and include numerous standard features along with various options for A/C and heat, rear view camera and panoramic mirrors.

Crown Service and Support

The C-D Series is a robust forklift backed by Crown's nationwide service and support network, including quality parts and the assured performance of the Crown Integrity Service System®.

Crown CD60-90 Diesel Pneumatic Forklifts,
Performance and Support that Exceeds Expectations.
