

MPC SERIES

VERSATILITY

PRODUCTIVITY FROM DOCK TO STOCK

Optimize your operation with one of Crown's most versatile lift trucks. Whether on a dock loading and unloading, transporting, order picking or stocking the MPC delivers optimal functionality with its industry-leading design.

Learn how the MPC 3000 can give your entire operation the Crown advantage.

Multiple Mast Options

Three available masts with lift heights ranging from 31" to 169" help you optimize tasks from ergonomic order picking to multi-level replenishment.

Performance and Control

Onboard sensors monitor steer wheel angle, fork height and load weight and adjust speed and acceleration to provide safe operation and precise control.

Large Load Wheels

Large load wheels provide long life and are designed for easy access and replacement.

Lift/Lower Buttons

Optional lift/lower buttons mounted in the backrest offer an extra vantage point on or off of the truck for load positioning.

Visibility

The overhead guard, mast and fork carriage are all optimized to provide operators with best in class visibility when maneuvering and positioning loads on the floor and at height.

Boost your productivity with one of the most **versatile lift trucks available from Crown!**
