

PICK EFFICIENTLY AND MANEUVER EFFORTLESSLY

Crown's PC 4500 Series works with any operator to bring out the best—during order picking, in transport or on the dock.

In low-level order picking, small improvements in the picking process contribute to big operational gains. Whether you choose the standard PC 4500 or QuickPick® Remote option, you'll benefit from features that **save time and effort** on every pick.

Discover why the PC 4500 Series is a wise investment for your entire operation:

Rugged and Powerful

A Crown-designed and -built AC drive unit features robust in-line spur gears and top and bottom mounting, providing superior durability. Frictionless e-GEN® braking virtually eliminates brake maintenance.

Built to Endure

The industry's strongest and most durable under-carriage is backed by a 5-year guarantee. Steel power unit doors provide an extra measure of protection to internal components.

All-around Comfort

Operators experience effortless handling thanks to electronic power steering and the X10® Handle. The spacious platform—with premium floor mat and padded wrap-around backrest—enhances comfort and reduces fatigue.

Maximize Productivity

Crown's exclusive Access 1 2 3® technology optimizes control and performance. The Access 1 2 3 display facilitates advanced diagnostics and programming.

Redefine Low-Level Order-Picking

Crown's exclusive QuickPick® Remote system automates tasks that simplify workflow. It minimizes operator fatigue and increases operator productivity, all while promoting safety and reducing damage.

PC 4500 Series — Make the **smart move**—effortlessly.
