

RT SERIES

MANEUVERABILITY REDEFINED

Busy docks and congested warehouse environments require lift trucks with the agility to excel in tight spaces. When inches count, depend on the RT 4000 Series from Crown to provide the performance you need in a package that helps maximize your floor space.

Find out how the RT 4000 can help you move more in a compact design.

Maneuverability

Over 10 inches shorter in head length than competitive designs for uncompromised maneuverability and performance.

Intuitive Controls

The steer tiller is sized and positioned to minimize shoulder and arm stress, while the traction and lift/lower controls are oriented to intuitively match the intended direction.

Safety and Comfort

Safety is built in with Crown's brake release pedal and patented entry bar safety switch, while the soft, wrap-around lean pad and suspended floorboard provide excellent operator comfort.

Component Protection

Engineered to withstand the extreme abuse pallet trucks may encounter in congested work areas.

- Reinforced steel skirt
- Steel wrap-around sidewalls
- No exposed plastic parts in impact areas

Access 123® Comprehensive System Control

Enables reliable, industry-leading lift truck performance and diagnostics and is incorporated across the entire Crown line.

Find out how the RT 4000 can make your operation more productive today!
