

ST/SX SERIES

SPACE-SAVING SOLUTIONS

Designed with versatility in mind, the ST/SX 3000 Series stackers satisfy a wide range of applications. The ST 3000 offers a 2,500 pound capacity, while the SX 3000 is available in 3,000 or 4,000 pound capacities and accommodates a higher amp hour battery.

The compact footprint, exceptional control and rugged design contribute to **safe, efficient operation** and **long-term value**.

Discover how the ST 3000 and SX 3000 Series simplify load handling and placement:

Robust and Reliable

The drive unit design includes a heavy-gauge steel housing and large spur gear set. It's secured at the top with a permanently lubricated twin-conical roller bearing.

Built to Last

A heavy-duty frame, mast and outriggers—combined with a cast-aluminum control handle and steel power unit cover—contribute to less downtime and extended truck life.

Handling Ease

Crown's innovative X10® handle simplifies operation and reduces fatigue. The brake override feature allows maneuvering in tight areas.

Superior Visibility

The sloped, low-profile power unit cover, center-mounted handle and clear mast design provide operators an exceptional all-around view.

Application Flexibility

The ST/SX Series can be equipped with a variety of Work Assist® Accessories, Remote Raise/Lower, and a work platform to simplify work tasks.

ST/SX 3000 – A **safe** and **efficient** way to move and stack loads.
