

TR SERIES

EXPERIENCE THE MOST **POWERFUL** ADVANTAGE IN TOWING.

Crown's TR 4500 Series provides the pulling power and strength needed to significantly improve throughput and withstand the rigors of the toughest applications.

Offering unmatched durability and advanced ergonomics, the TR 4500 outlasts and outperforms all other brands.

Discover the operational advantages of the TR 4500 Series:

Tow Longer

A Crown designed and built drive unit has a powerful AC drive motor, robust in-line spur gears and is top and bottom mounted to provide power and durability that competitors can't match. Crown's e-GEN® braking system is maintenance free.

Built to Endure

The TR 4500's frame is built with heavy-gauge steel for added strength and extended life. Steel power unit doors and a cast aluminum control handle withstand greater impacts and offer protection not afforded by competitor's polymer components.

Optimize Control

On the TR 4500, operators experience effortless handling, reduced fatigue and simplified control thanks to electronic power steering and the X10® handle's superior ergonomics.

Operate Comfortably

Crown knows how operator fatigue impacts productivity. The TR 4500 includes a shock-absorbing floorboard with premium cushion and padded wrap-around backrest to maximize comfort and improve productivity.

Maximize Productivity

Crown's exclusive Access 1 2 3® control system enables safe, reliable, industry-leading truck performance and diagnostics. It optimizes speed based on the steer angle and ensures smooth and consistent plugging, acceleration and braking.

Choose Crown's TR 4500 Series for Proven Pulling Power.
