

VALUE AND VERSATILITY

Engineered for versatility, the M 3000 walkie straddle stacker provides a cost-effective solution for lifting, loading and stacking applications. With a 2000 lb capacity, the M 3000 provides reliable performance, extended runtime and a longer battery life.

A compact footprint, durable design and intuitive controls contribute to safe, efficient operation with proven reliability and long-term value.

Discover how the M Series meets your load handling needs:

Robust and Reliable

The drive unit design includes a heavy-gauge steel housing and large spur gear set. It's secured at the top with a permanently lubricated twin-conical roller bearing.

Built to Last

A heavy-duty frame, mast and outriggers—combined with a cast-aluminum control handle and steel power unit cover—contribute to less downtime and extended truck life.

Handling Ease

Crown's innovative X10® handle simplifies operation and reduces fatigue. The brake override feature allows maneuvering in tight areas.

Application Flexibility

This series is a complete lifting, loading, and stacking solution. The M 3000 can be used as a portable workstation, is able to stack loads 2 to 3 high in racks and maneuver loads in tight aisles or work areas.

Key Accessories

The M Series can be equipped with a variety of Work Assist® Accessories, Remote Raise/Lower, and a work platform to simplify work tasks.

M 3000 Series - **A versatile and efficient** load handling solution.
