Battery Charging & Net Runtime

		Charging Time (hours)					
Battery	5A Ch	5A Charger 10A Charger					
Туре	Charge from 20% to 80% SoC*	Charge from 0% to 100% SoC*	Charge from 20% to 80% SoC*	Charge from 0% to 100% SoC*	1300 lbs @3 mph (600 kg @5km/h)		
9.8 Ah	1:00	2:00	N/A	N/A	up to 1:15		
19.6 Ah	1:30	3:00	1:00	2:00	up to 2:30		

- ⁵ The residual runtime indicator on the battery display shows the remaining runtime and adapts to various duty cycles with a learning algorithm.
- ⁶ The net runtime is measured with a weight of 1300 lbs @ 3.1 mph (600 kg @ 5km/h) travel speed.
- * State of Charge (SoC). All times are estimates.

Other Options Available

Contact factory for additional options.

Dimensions and performance data given may vary due to manufacturing tolerances. Performance is based on an average size vehicle and is affected by weight, condition of truck, how it is equipped and the conditions of the on-site operating area. Crown products and specifications are subject to change without notice.

You can count on Crown to build lift trucks designed for safe operation, but that's only part of the safety equation. Crown encourages safe operating practices through ongoing operator training, safety-focused supervision, maintenance and a safe working environment. Go to crown.com and view our safety section to learn more.
